[OEM](#) [Flush / Sanitary](#) [Differential](#) [Cryogenic & High Temp.](#) [Sub Sea](#) [Accessories](#)

[Oil & Gas Pressure Transmitters](#)

Utilized for fracing, cementing, acidizing, pipeline, sub sea, BOP, Coil tubing and other upstream applications.

[Melt Pressure / High Temperature Transducers](#)

High temperature, flush transmitters designed for the melt/ plastics industry.

[Industrial & Test Stand Transducers](#)

Utilized for Industrial applications as well as high accuracy test stands.

[Aerospace Rated Pressure & Temperature Transducers](#)

Transducers rated for Aerospace as well as all military applications. High reliability, Rad-hardened & cryogenic ratings available.

[Sub Sea Pressure & Temperature Transmitters](#)

[Differential Pressure Transmitters](#)

Utilized in subsea upstream oil wells as well as NAVY & ROV's applications. Ratings to 30,000 Feet.

Compact DP Transmitters for ranges from 0-0.5 Inches of water thru 20,000 PSID.

Low Cost OEM Pressure Transducers

Higher volume lower cost pressure solutions.

Flush Diaphragm & Sanitary Pressure Transmitters

Non-clogging and sanitary rated flush faced transmitters.

Cryogenic & High Temperature Transmitters

Pressure & Temperature solutions rated from -320° F to 700° F.

Water Treatment Pressure & Level Transmitters

Transmitters for Lift stations, pond, weir or tank level & pressure measurement applications. Includes Blue Ribbon line of Gauges and Controllers.

Submersible Level Transmitters

Level transmitters for precise measurement in tanks, ponds or weirs.

Accessories

Panel Meters, Mounting Brackets, & Accessories to round out your product needs.
